	Weiler, Wilhelm F.	Canada	52.50	54.65	107.15

1. The first step is to identify the problem or question that needs to be solved.

2. Next, gather all the relevant information and data that will be needed to solve the problem.

3. Then, analyze the information and data to determine the best approach to solve the problem.

4. Finally, implement the solution and evaluate the results to ensure that the problem has been solved.
